Elements Project (worth 150 points)

Introduction
You are one of many important elements found on the periodic table: carbon, oxygen, nitrogen, hydrogen, iron, phosphorus, potassium, sodium, calcium, sulfur, chlorine, gold, silver, or copper. As one of the most important elements on Earth, you are an employee of the World Element Corporation. Due to recent cost increases, the World Element Corporation has been forced to lay off some of its workers. Because you are terrified of losing your job, you have decided to design a presentation for the Executive Board of the World Element Corporation (i.e. your teacher), defending your position in the company. You must be convincing and clearly explain the importance of your role. Good luck - the “World” depends on you!

The Task
For this task, you must come up with a persuasive presentation (in the form of a letter and foldable presentation board) to give the Executive Board of the World Element Corporation, that explains why you should keep your job. The project must include:

<table>
<thead>
<tr>
<th>Major Assignments</th>
<th>Due Date</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Answers to the Key Questions and Bibliography</td>
<td></td>
<td>30 pts</td>
</tr>
<tr>

World Element Corporation
138 Periodic Table Street
Scivry, CA 95240

Dear Executive Board,

Before I introduce myself, I would like to start off by saying that I am one of the most important employees of the World Element Corporation. My name is Mercury Mana, but my friends call me Hg. This letter will explain exactly why you should keep me, Mercury, on your staff at the World Element Corporation. There may be some other elements that you could hire, but I am not one of them!

I have been working at the World Element Corporation for as long as I can remember. In fact, I've been here since ancient times! It has been such a long time that I can't even remember the name of the person who discovered me and brought me to work at your company. In case you don't remember what I look like, I have some very special properties that make me stand out among everyone else. First of all, I'm the only element in the entire World Element Corporation. I have a beautiful silver coloring that really brings out my personality! In addition, if you look inside me, you would see that I have 80 protons, 80 neutrons, and 80 electrons. All of these atomic parts help me be a better worker here at the World Element Corporation.

I have many very important jobs at this company. For starters, I am used in thermometers to measure temperature, barometers to measure air pressure, and in some batteries to make electricity. I'm also very important in lighting the World Element Corporation because I am found in the fluorescent lamps that light up our hallways. Some people would call me a team player because I'm very good at working with the other elements in the company. For instance, chlorine and I have teamed up to make skin whitening makeup. Also, I've worked with sulfur to make a perfectly clear cinnamon gum. Since I work as well with others, I have many friends at the company.

You may be wondering why my friends call me Hg. It's because when I was discovered, I was named after the Latin word hydrargyrum, which means liquid silver. My first name comes from the planet Mercury. At this time, I'd like to also clear up any rumors about me being crazy. I've heard some people going around the company that I cause people to go a little loony when I get into their system. I must admit that I am very toxic if people eat me or eat any foods such as fish that may contain traces of mercury. I sneak into the blood system and do some major damage to people's brains. However, that's their fault for eating me! I'm not the crazy one...the people that eat me are the lunatics! If anything, I am the most important element in the entire World Element Corporation. Without me, vaccines to prevent many diseases wouldn't be what they are today. When they were first developed, vaccines contained Thuemeral which is partly made up of mercury.

If you fire me, the rest of the World will be so sad at you. They will never see a liquid metal at room temperature again! Can you imagine a world without such a beautiful substance as me? Sure, less people may be poisoned if you fired me, but that's beside the point. Please, oh please don't fire me from the World Element Corporation!

Sincerely,

Mercury Mana
Key Questions

Be sure to answer #5-10 in COMPLETE SENTENCES to receive full credit!

1. **What is your name?** (the name of the element)

2. **What is your nickname?** (the element symbol)

3. **How long have you been working for the World Element Corporation?**
   (When were you discovered?)

4. **Who hired you at the World Element Corporation?** (Who discovered you?)

5. **What do you look like?** (Describe the physical properties of your element in a complete sentence.)
6. What are your specific job(s) at the World Element Corporation? (What is your importance on Earth? Answer in a complete sentence.)

7. What are some examples of how you work with other “departments” (other elements) within the World Element Corporation? (Answer in a complete sentence.)

8. What are three interesting facts about you, as an element? (Answer in complete sentences.)

• __________________________________________________________________________
  __________________________________________________________________________
  __________________________________________________________________________

• __________________________________________________________________________
  __________________________________________________________________________
  __________________________________________________________________________

• __________________________________________________________________________
  __________________________________________________________________________
  __________________________________________________________________________
9. What makes you the most important employee of the World Element Corporation? (Use facts to back up your opinions and answer in a complete sentence.)

10. What would happen to the World Element Corporation if you were 'fired'? (If your element did not exist on Earth, what would be different?) Try to be as specific as possible and answer in a complete sentence.

World Element Corporation
118 Periodic Table Street
Science Town, CT 12345

Dear Executive Board,

Before I introduce myself, I would like to start off by saying that I am one of the most important employees at the World Element Corporation. My name is Mercury Mania, but my friends call me Hg. This letter will explain exactly why you should keep me, Mercury, on your staff at the World Element Corporation. There may be some other elements that you could fire, but I am not one of them! I have been working at the World Element Corporation for as long as I can remember. In fact, I've been here since ancient times! It has been such a long time that I can't even remember the name of the person who discovered me and brought me to work at your company. In case you can't remember what I look like, I have some very special properties that make me stand out among everyone else. First of all, I'm the only liquid metal in the entire World Element Corporation. I have a beautiful silver coloring that really brings out my personality! In addition, if you looked inside my atom, you would see that I have 80 protons, 80 electrons, and 121 neutrons. All of these atomic parts help me be a better worker here at the World Element Corporation.

I have many very important jobs at this company. For starters, I am used in thermometers to measure temperature, barometers to measure air pressure, and in some batteries to make electricity. I'm also very important in lighting the World Element Corporation because I am found in the fluorescent lamps that light up our hallways. Some people would call me a team player because I'm very good at working with the other elements in the company. For instance, chlorine and I have teamed up to make skin whitening makeup. Also, I've worked with sulfur to make a toxic paint called vermillion pigment. Since I work so well with others, I have many friends at the company.

You may be wondering why my friends call me Hg. It is because when I was discovered, I was named after the Latin word hydrargyrum, which means liquid silver. My first name comes from the planet Mercury. At this time I'd like to also clear up any rumors about me being crazy. I've heard some gossip going around the company that I cause people to go a little loony when I get into their system. I must admit that I am very toxic if people eat me or eat any foods such as fish that may contain traces of mercury. I sneak into the blood system and do some major damage to people's brains. However, that's their fault for eating me! I'm not the crazy one...the people that eat me are the lunatics! If anything, I am the most important element in the entire World Element Corporation. Without me, vaccines to prevent many diseases wouldn't be what they are today. When they were first developed, vaccines contained Thiomersal which is partly made up of mercury.

If you fire me, the rest of the World will be so mad at you. They will never see a liquid metal at room temperature again! Can you imagine a world without such a beautiful substance as me? Sure, less people may be poisoned if you fired me, but that's beside the point. Please, oh please don't fire me from the World Element Corporation!

Sincerely,

Mercury Mania

Dear _______________________, (You are writing this to the Executive Board)

**Paragraph 1: Main Idea, Introduction, Answers to questions 1 & 2**

The point of this letter is...

Introduction...

My name is...

My nickname is...

**Paragraph 2: Answers to questions 3,4,5**

3) I’ve been working at the World Element Corporation since...

4) The person who hired me was...

5) I look like...

**Paragraph 3: Answers to questions 6,7**

6) I am important because...

7) I work with other elements such as to make...

**Paragraph 4: Answers to questions 8,9**

8) Some interesting facts about me are...

9) I am the most important employee Because...

**Paragraph 5: Answer to question 10, conclusion statement**

10) If you fire me then...

In conclusion...
Persuasive Letter Rough Draft

To help you write your letter, you will use the answers from your ten key questions to write each paragraph. (Paragraphs need to be at least FIVE sentences!) You may follow the suggested guide to help you organize your paragraphs. Be sure to use transition words between sentences and paragraphs. Pretend this is a sales pitch to a REAL company about why you should NOT be fired!

Foldable Presentation Board

Today's Date: _______

Foldable Presentation Due Date:

Use the pictures of your teacher's sample as a guide to help you design your foldable presentation. Once you have completed each of the required components, check them off on the checklist provided.

CHECKLIST
Your foldable presentation MUST include:

Cover of Foldable:

_____ Student name and made-up element name on front lower corner
_____ Student name with element symbols substituted for letters in name

Inside Foldable:

Left Side

_____ Element information foldable
_____ Picture or drawing of atomic structure (nucleus with protons and neutrons, electron cloud with electrons)
_____ Flip Foldable (element's location on periodic table on outside, periodic table picture on inside)

Middle

_____ Letter to the WEC glued to center of presentation board

Right Side

_____ Photo Album (graph paper accordion foldable with at least three pictures)
_____ Business Card (pocket with WEC labeled, business card made on index card)

Cover of Foldable:

![Cover of Foldable Image]

Inside Foldable:

=
1) Write your first and last name on the spaces below. (Make sure to put spaces between each letter. Then, circle the individual letters or letter combinations that appear as element symbols on the Periodic Table. (See the example to help you.)

_________________________________      ________________________________

First       Last

Ex. M     r     s     K     u     e     b     l     e     r

2) In the blank squares below, fill out a box for each letter or pair of letters you circled. Each box must include the element symbol, atomic number, and atomic mass. Use the model to help you. These will be cut out and glued on the front of your elements project.
When writing the rough draft of your letter today:

• Try to write as neatly as possible.
• Be sure to write in complete sentences.
• Use lots of detail!
• Use good transition words so sentences and paragraphs don't sound awkward.
• Paragraphs should be at least 5 sentences!
• Use a little bit of humor to make the letter interesting.
